Director of
Communications

Modern hospital care is changing

- hospital care is about more than beds and buildings it's about how we organise care around our patients
- national and international best practice recommends separating planned and emergency care
- we work with system partners to avoid hospital admission and if patients are admitted, to reduce their length of stay
- digital technology means that we can safely monitor patients in their own homes, saving hospital visits and promoting independence
- modern booking systems and better ways of working put the patient in control of their own healthcare – making it personalised
- treatment pathways are developed on evidence-based care and standardised methods which drives up quality and clinical outcomes

How Hemel Hempstead fits in our plans for three networked hospitals providing specialist, emergency, urgent & routine care

Hemel Hempstead Planned medical care

- older people's care and long term conditions
- one stop clinics
- new and upgraded diagnostics: DEXA, MRI, CT

Also:

- urgent care
- routine outpatient clinics
- some maternity services

St Albans City Planned surgery

- expanded range and volume
- · rapid diagnostics
- one stop clinics
- cancer support services
- fluoroscopy, MRI, CT
- lower risk of cancellations

Also:

- urgent care hub
- routine outpatient clinics
- some maternity services

Watford General

Emergency and specialist care

- 'same day' emergency care
- complex diagnostics
- women's & children's services
- new inpatient accommodation with high ratio of single rooms

Also:

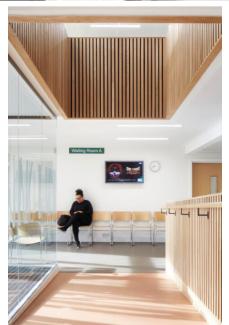

- urgent care
- routine outpatient clinics

Plans for Hemel Hempstead Hospital

- plays a key role in our confirmed model
- planned medical care and services for patients who are elderly or who have long-term conditions
- ethos of holistic and 'anticipatory' care
- wide range of outpatient care and urgent care for many (approx. 88,000 outpatient appts and 43,000 attend UTC)
- approximately 56,000 diagnostic tests
- being part of a national funding programme may result in changes to plans beyond our control
- we are planning for refurbishment throughout and new extension for diagnostics
- rationalisation of overall site with potential to release land for regeneration – health or housing

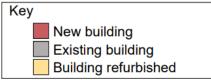

Plans for Hemel Hempstead Hospital (continued)

- one-stop clinics consultant appointment, diagnostics, treatment all in the same visit
- input of multidisciplinary teams to deliver the 'one stop' model of care
- provide better and faster diagnosis; MRI, CT and DEXA
- expand outpatient services for paediatrics, respiratory, cardiology and dermatology
- clinical hub for specialist diabetes services providing our main base for outpatient specialist diabetes care

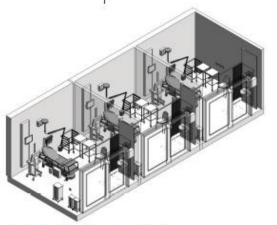

Proposed new and refurbished buildings

Our next steps (after OBC submission)

Contractor appointed & full business case developed

Final funding & main build contract agreed

Enabling and ground works

Construction starts

Meanwhile ...

- being alert to other sources of funding where this might be possible for smaller elements of our overall programme
- ensuring current updates compliment our future redevelopment plans wherever possible
- ensure money is put to good use for the future as well as the present
- carrying out refurbishments when needed and not just waiting for the redevelopment funds
- keeping the conversation going with clinical staff to ensure that our designs continue to match plans based on great patient care
- engaging on new and emerging clinical models so that our decisions are informed by our patients

Working collaboratively

- assessing, planning and delivering care together
- multidisciplinary meeting spaces for staff
- a model for how planned care can be delivered from a multi-specialty site
- offer health and wellbeing support for a wide range of long-term conditions
- helping patients manage their own care
- the service will identify people with multiple complex needs
- working with primary, community, mental health and social care partners to provide holistic packages of care

A note on emergency care

- modern emergency care is also changing nationally and internationally
- has become a highly specialised form of medicine needing the input of a wide range of specialties and facilities to support early assessment
- small satellite units at all three hospital sites no longer considered safe or sustainable
- important emergency department is linked to the rest of the hospital vital departments such as intensive care and paediatrics
- 24-hour service with appropriately trained and expert staff
- access to all the resources necessary to deliver optimum and safe care
- specialists available for rapid diagnosis and treatment for emergency cases
- emergency care will continue to be based at Watford General

Benefits for patients...HHH

Rheumatology

DEXA scanner to support the development of a rheumatology hub

- **Enhanced technology**
- One stop clinics
- DEXA, MRI, CT

Better spaces for staff

Technologically-enabled meeting rooms so that staff from different medical specialties can work together for the benefit of our patients PLUS better rest areas

Centre of excellence

Great care for patients with long term and/or multiple conditions in a calm environment- in line with leading international healthcare

- **Faster diagnosis**
- **Urgent care**

Putting patients in control

Patients will have more autonomy in their care and be encouraged to manage their conditions by using technology to monitor their health and update their clinical teams

NEW diagnostic facilities and the latest technology will cut the wait for a diagnosis and improve efficiency

'One stop' clinics

Patients can have more steps of their treatment covered in one visit thanks to new and improved diagnostic facilities and more and bigger medical specialty teams based on site

Urgent care

Benefits for patients...SACH

Recover in comfort

The replacement of theatres also includes expanded recovery areas

Infection control

Running SACH as a planned care

infection – this helped us greatly

during the pandemic to continue to

treat patients and keep them safe

hospital minimises the risk of

- **Rapid diagnostics**
- One stop clinics
- **Cancer support services**
- Fluoroscopy, MRI, CT
- **Urgent care**

All under one roof

New diagnostic equipment means patients no longer travel for scans and other parts of their treatment as we move to 'one stop' clinics

More surgery, fewer cancellations!

Expanded range of surgery which will be protected from the peaks in demand in the emergency and medical activity at WGH and larger teams to provide cover

Reduced anxiety

Rapid results will deliver peace of mind and also help us plan the next steps of treatment, if any is needed

endoscopy, cystoscopy

New facilities with the latest

we provide cancer surgery

equipment, co-located where

Benefits for patients...WGH

Sustainable and spacious

Our new building will be environmentally friendly and there will be green spaces and also more spacious patient areas

Our new women and children's building will have specially equipped rooms for antenatal, labour and postnatal care meaning mum and baby can stay put

- **Expanded emergency care**
- Technology-enabled site & services
- **Complex diagnostics**
- Vastly improved patient & staff areas
- Services organised better together

A high ratio of single rooms and the latest design and ventilation will be used to keep us all protected from infection

Fighting infection

Family planning

Paediatric services will be in the main. building with child-friendly design

and more assessment space so that specialists come to patients and not vice-versa

Bigger unit, better equipment
