Please note:

1. HHGH %<4hrs is a validated position whereas the time in department metric is derived from unvalidated departure times. Initial assessment time is used as a proxy for arrival time for HHGH time in department metric and HHGH time to treatment metric due to data quality issues with the capture of arrival times.

2. WGH 95 percentile Time to initial assessment (Ambulances), is currently derived from the earliest tracking step time of Triage assessment and Initial assessment, and further work is underway to include the first clinical event in STARR location in the logic.
